YOU CAN DEPEND ON Tempilstik°

HOW TO USE Tempilstiks
General Directions: Stroke heated surface with
TEMPILSTIK°. A liquid smear will show at the
300° F
TEMPILSTIK°

temperature indicating crayons

because...

Each batch of Tempilstiks° is certified for melting point by our laboratory — and independently tested for accuracy by a distinguished firm of metallurgical chemists.

Accuracy Certified TEMPILSTIKS° provide a simple method of determining temperatures in welding and heat treating; hardening and tempering of tool steels; monitoring safe operating temperatures of electronic and electrical equipment and components; molding and postforming of plastics; tire retreading; steam trap maintenance . . . and numerous other heat dependent operations in science and industry. Make your choice from over one hundred certified temperature ratings listed in the table below.

AVAILABLE IN THE FOLLOWING DEGREES (°F)

100	169	250	331	475	900	1400	1950
103	175	256	338	488	932	1425	2000
106	182	263	344	500	950	1450	2050
109	188	269	350	525	977	1480	2100

ISSUE THEMES

Jan.—**Non-destructive testing:** changes; brazed joints.
Feb.—**Mig welding:** vertically on aluminum; CO_2 on high-rise.
March—**AWS show, brazing:** show events; exhibitors; brazing for versatility; aerospace applications; for the Navy; for nuclear reactors; furnace brazing; noteworthy applications; automating; automatic machine.
April—**Distortion control:** vibratory; insulating cream.
May—**Automation:** stud welders; beam line punching; semiautomatic welding.
June—**EB welding:** state of the art; tiny parts.
July—**Induction and resistance heating:** steel tubing; about induction heating; stress relief in 800-ton vessel; commercial heat treating; induction efficiency in heating pipe; sensitive spot welding.
Aug.—**Quality control and inspection:** field welding in refineries.
Sept. —**Welding costs:** building; saved with CO_2 units; reduced with hanging wire.
Oct.—**Welding safety:** Mig fume study.
Nov.—**Hardfacing:** problems; industry opinions; what it can do.
Dec.—**Weldability of Steels:** penetrating its mystique.

Acids or cryogenics: stainless serves, July, p. 50
Adapter doubles cutting capacity, Feb., p. 70
Aerospace brazing, March, p. 62
All you need to know about welding cable, Feb., p. 54
Aluminum alloy rings, flash-butt welded for Poseidon, April, p. 50
Aluminum Mig goes vertical, Feb., p. 45
Aluminum prep methods can cause contamination, Part I, Oct., p. 50; Part II, Nov., p. 50
Aluminum, steel team for giant LOX tank, Nov., p. 49
Applications for hardsurfacing, Nov., p. 45
ASM's Materials Engineering Show Report, Nov., p. 19
ASNT conference schedules full welding program, Feb., p. 76
Automated welding of Caddy floor pans, May, p. 41
Automatic stick electrode welding method, March, p. 54
Automatic wire-fed brazing cuts costs, March, p. 73
Automating a brazing operation, March, p. 70
Automation in stamping plant, March, p. 95
Award-winning bridge stands on welded steel, May, p. 68
AWS conference to 'join' past, future progress, March, p. 47

B

Basket for centrifuge welded for more speed, May, p. 46
Battery cell connectors, RW application, March, p. 52
Beam line eliminates layout, speeds web & flange hole punching, May, p. 44
Boat, concrete and welding team to make it, April, p. 70
Brazed joint quality tested electromagnetically, Jan., p. 41
Brazing, aerospace, March, p. 62
Brazing application, noteworthy ones, March, p. 68
Brazing graphite to Hastelloy N for nuclear reactors, March, p. 65
Brazing machine with a brain, March, p. 73
Brazing operations, how to automate, March, p. 70
Brazing refractory metals in a furnace, March, p. 66
Brazing, where it fits in, March, p. 61
Brazing with a quartz lamp, March, p. 64
Bridge building, cutting the cost 10 ways, Jan., p. 55
Bridge is welded, wins award, May, p. 68
Bridge or barge: Seabees 'can do', Oct., p. 46
Bridge's welded design wins bid, Sept., p. 58
British develop 3-setting welder, Aug., p. 48
Business philosophy for fabricators, Feb., p. 53

C

Cable for welding, all you need to know about, Feb., p. 54
Capline moves north in six spreads, July, p. 48
Case for induction resistance welding of steel tubing, July, p. 39
Cast-weld is world's largest, Oct., p. 48
Casting finds answer in welding, Jan., p. 68
Centrifuge basket welded for more speed, May, p. 46
Certification of weldors; proper preparation, July, p. 57
Challenge on Wilshire Boulevard, Oct., p. 66
Changing a city skyline; CO_2-Mig 'corners' a high-rise, Feb., p. 49
Changing character of commercial heat treating, July, p. 44
Chicago hosts AWS convention, March, p. 47
Clearing the fog about Mig fumes, Oct., p. 41
CO_2-Mig speeds turbine part assembly, Dec., p. 58
CO_2 units aid farm implement production goals, Sept., p. 52
Coating composition for electrode, Jan., p. 45
Computer components, discrete Tig welds for IBM's, Nov., p. 74
Concrete mixers fabricated with Mig welding, June, p. 84
Considerations in automating a brazing operation, March, p. 70
Cost reducing on industrial buildings, Sept., p. 45
Cryogenics or acids, stainless gets the call, July, p. 50
Crystal power gives x-ray punch, May, p. 55

D

Design for spun-cast-weld, Dec., p. 68
Design stresses are higher for quarter hard 301 stainless, April, p. 54
Discrete Tig welds for IBM computer components, Nov., p. 74
Distortion cut with insulating cream, April, p. 49
Distortion relieved by vibration, April, p. 47
Drill collars restored with sub-arc welding, July, p. 52

E

EB joins tiny parts, holds lap fit tolerances, June, p. 45
EB job shop bridges 'gap', Nov., p. 78
EB welding: a firmer foothold, Dec., p. 48
EB welding applications keep growing, Jan., p. 56
Editorials — A matter of value, Jan., p. 35; The inconstant constant, Feb., p. 43; Which came first, March, p. 45; A step behind, April, p. 45; Pass it on, May, p. 39; Steel quotas, everyone's concern, June, p. 41; Brining skills to S. America, July, p. 37; Motivation to excel, Aug., p. 37; Straight talk about curves, Sept., p. 43; A piece of cake, Oct., p. 39; Hardfacing: face up to problems, Nov., p. 39; The best and the worst, Dec., p. 41
Electrode coating; their composition, Jan., p. 45
Electron beam facility looks to long-run contracts, Sept., p. 77
Electron beam welder optics, how to align, Aug., p. 50
Electron beam welding: Where is it today, June, p. 43
Engineering data sheets: No. 329, Gas conversion data, Jan., p. 61; No. 330, Steel column compression, Feb., p. 63; No. 331, Welding wire requirements, March, p. 81; No. 332, Powers and Roots of Numbers, April, p. 65; No. 333, Spot welding recommendation, May, p. 59; No. 334, Wall thickness, ASME code, June, p. 59; No. 335, Induction efficiency in heating pipe, July, p. 45; No. 336, Computing fillet weld stress, Aug., p. 53; No. 337, Tig welding selection

HIGH QUALITY AT LOW PRICE

Flood Always FINEST QUALITY FAIRLY PRICED

WELDING GOGGLES

LIGHTWEIGHT COMFORT

Flood welding goggles are designed to provide superior protection, maximum comfort, and long service life — all at a low price.

CUP WELDING GOGGLES

MODEL 14-FS

Cups and rings of strong thermoplastic. Aluminum baffled vents are light shielded. Patented adjustable, ball chain bridge and longwearing nylon plastic headband.

COVER GOGGLES

Comfortable, lightweight and conform to wearer's face. With rigid brace bar. Goggles will amply accommodate wide-frame modern glasses.

MODEL 101-FS

MODEL 300-W

FULL VIEW GOGGLES

Uses standard 2"x4¼" welding lens. Has front loading lens holder. Baffled screen vents provide 6 way ventilation.

LIFT FRONT GOGGLES

Hinged lift front is spring secured in raised or closed position. When raised, extra set of clear 1000 Hr. lenses afford added safety. Carefully molded to hug facial contours, seal out light and permit the use of large modern glasses.

MODEL 350-FS

There is a Flood goggle to fit any requirement in welding, chipping, grinding, chemical and dust protection. See your local supplier or write for form No. 44-C

BRONZE PENETRATES DEEPER WITH

"ANTI-BORAX"

NO. 2 BRAZING FLUX

. . . not only deeper, but a stronger union is provided than is possible with other fluxes.

ANTI-BORAX #2 Brazing Flux is ABSOLUTELY GUARANTEED to do the BEST JOB at the LEAST COST . . . when used as instructed.

Packed in 1 lb. and 5 lb. cans and bulk

FUNCTIONAL PRODUCT PACKAGE DESIGN

Removal of small center cap provides special opening for positive, no waste, application of Anti-Borax Welding Flux to the welder's rod.

SAFE • ECONOMICAL • NON-TOXIC

Write for free sample and descriptive literature covering all Anti-Borax products made for the welding industry.

ANTI-BORAX COMPOUND CO., INC.

1506 Wall Street • Fort Wayne, Indiana 46804

SAVE UP TO 40% ON YOUR WELDING AND HANDLING COSTS

WITH AN MBC WELDING POSITIONER

FOR EASY DOWNHAND WELDING
CAPACITY — Up to 100 lbs.
POSITIONS — Horizontal to 90° vertical
REVOLVES — ¼ to 2½ RPM
REGULATED BY "DIAL-MATIC" CONTROL

Philosophy of fabrication, Feb., p. 50
Physics in welding: Part XII, Jan., p. 58; Part XIII, Feb., p. 74; Part XIV, May, p. 74; Part XV, June, p. 80; Part XVI, July, p. 58
Pipeline for an Illinois river project, Oct., p. 52
Pipeline for oil — the Capline project, July, p. 48

Pipeline safety and Senate Bill S1166, April, p. 58
Pipeline welding; new products, Jan., p. 42
Plastic design cuts steel use in high-rise building, Jan., p. 52
Pontoon for Viet Nam is of welded steel, Oct., p. 46
Poseidon design: flash weld aluminum alloy rings, April, p. 50
Predicting heat input for welding, Dec. p. 59
Preparation of aluminum surfaces for welding, Part I, Oct., p. 50; Part II, Nov., p. 50
Problem of wear; hardfacing's solution, Nov., p. 41
Progress report on EB welding, June, p. 43
Promise of steel in a residential market, June, p. 48
Punching holes with a beam line, May, p. 44
Putting 'feel" back into spot welding, July, p. 46

Q

Quality control for field welding in refineries, Aug., p. 39
Quartz lamp does brazing job for the Navy, March, p. 64

R

Refineries require quality control in field welding, Aug., p. 39
Resistance heat relieves stress in 800-ton vessel, July, p. 43
Resistance spot welding, putting "feel" back into it, July, p. 46
Resistance welding improves battery cell connectors, March, p. 52
Resistance welding of steel tubing by induction, July, p. 39
Rickover: Government must control safety codes, (Materials Engineering Show Report), Nov., p. 19
Robot stud welds Caddy floor pans, May, p. 41

S

Sales statistics of welding industry, 1967, Fact File, p. 18
Saturn components joined by five-axis N/C Tig welder, Sept., p. 70
Sculpture for a fashion center, Feb., p. 72
Sculpture shows 'the stuff it's made of,' Dec., p. 72
Seabee pontoon is welded, Oct., p. 46
Semiautomatic welding, changing from manual, Jan., p. 60
Semiautomatic welding: open-arc and sub-arc, May, p. 70
Senate Bill S1166: Its implications for the pipeline industry, April, p. 58
Sensitive resistance spot welding explained, July, p. 46
Short on skilled welders; long on short-arc, May, p. 72
Shorting-arc bridges the gaps, Oct., p. 69
Simplicity engineering to reduce industrial building costs, Sept., p. 45
Skyscraper; welding in construction, March, p. 50
Spin one, weld too, Dec., p. 68
Stainless steel for cryogenic or acid containers, July, p. 50
Stainless 301, higher design stress for, April, p. 54
Steel house welded in California, June, p. 48
Steel mine shaft fabricated vertically, Aug., p. 43
Steel use cut 10% with plastic design, Jan., p. 52
Stress relief in nuclear reactor pressure vessel, July, p. 43
Stress relief through vibration, April, p. 47
Stud welding Caddy floor pans automatically, May, p. 41
Stud welding cuts costs of water meters, June, p. 78
Sub-arc restores drill collars, July, p. 52
Sugar extraction machine welded, June, p. 50
Surface prep methods for aluminum, Part I, Oct., p. 50; Part II, Nov., p. 50

T

TD nickel weld techniques to improve rocket, jet engines, Aug., p. 42
Technique for welding high vacuum equipment, June, p. 52
Techniques of welding ductile iron, Part I, Nov., p. 57; Part II, Dec., p. 50
Ten ways to cut costs of bridge building, Jan., p. 55
Testing, changes in non-destructive methods, Jan., p. 36
Tests justify higher design stress for welded quarter-hard 301 stainless, April, p. 54
Tig weld techniques for TD nickel in rocket, jet engines, Aug., p. 42
Tig welded, five-axis N/C, joins Saturn components, Sept., p. 70
Tig welding muffler bodies, March, p. 92
Tig welding parameters can be transferred, Sept., p. 54
Tig welds, discrete, for IBM computer components, Nov., p. 74
To cast or not to cast; welding's the answer, Jan., p. 68
To weld a plastic switch: ultrasonics, July, p. 56
Tolerances are precise with EB welding, June, p. 45
Tubing; fast fin-welding on small ODs, May, p. 71
Tubing; induction resistance welding of, July, p. 39
Turbine part assembly faster with CO_2-Mig, Dec., p. 58

U

Ultrasonic welding for a plastic switch, July, p. 56

V

Vertical Mig welding of aluminum, Feb., p. 45
Vertical 'pipeline' for a potash boom, Aug., p. 43
Vibratory stress relief: New twist to the distortion problem, April, p. 47

W

Water meters stud welded, June, p. 78
Wear: hardfacing solutions, Nov., p. 45
Wear problem: What the hardfacing industry has to say about it, Nov., p. 41
Weld testing, changes in, Jan., p. 36
Weldability: penetrating its mystique, Dec., p. 43
Welded building on Wilshire Boulevard, Oct., p. 66
Welded, it's beautiful, March, p. 50
Welded sculpture at fashion center, Feb., p. 72
Welded sculpture shows 'the stuff it's made of,' Dec., p. 72
Welded steel design wins bridge bid, Sept., p. 58
Welder with 3 settings developed by British, Aug., p. 48
Welding applications for EB, Jan., p. 56
Welding battery cell connectors (RW), March, p. 52
Welding cable, all about it, Feb., p. 54
Welding, concrete make an 'instant' boat, April, p. 70
Welding ductile iron, Part I, Nov., p. 57; Part II, Dec., p. 50
Welding, EB, of small parts, June, p. 45
Welding helps tame an Illinois river, Oct., p. 52
Welding in Australia and Southeast Asia, Aug., p. 46; Sept., p. 50; Oct., p. 54; Nov., p. 64; Dec., p. 54
Welding meeting and show, AWS in Chicago, March, p. 47
Welding on the job: five case history applications, May, p. 56; two applications, Nov., p. 84
Welding, physics of: Part XII, Jan., p. 58; Part XIII, Feb., p. 74; Part XIV, May, p. 74; Part XV, June, p. 80; Part XVI, July, p. 58
Welding pipelines with new products, Jan., p. 42
Welding, progress of electron beam, June, p. 43
Welding solves a pressing problem, June, p. 50
Welding the double steel lined potash mine shaft, Aug., p. 44
Welding, the present position of EB, Dec., 48
Welding ups speed of centrifuge basket, May, p. 46
Weldors: are your properly prepared for certification?, July, p. 57
Where does brazing fit in?, March, p. 61
Wire-fed brazing machine ups production, March, p. 73
World's largest cast-weld, Oct., p. 48
World's largest tire: A welded mold made it better, Jan, p. 50

X

X-ray unit uses piezoelectricity, May, p. 55

Y

You, high frequency, the public and the FCC, June, p. 55

MARY HAD HER LITTLE LAMB.

WHO HAS MIGHTYMITE ?

(See page 35)

Senior 1/4" Floor Model Nibbler

FENWAY GV

FLOOR MODEL NIBBLERS OUT PERFORMS ALL OTHERS! Shears 5/16" & nibbles 1/4" mild steel & 3/16" stainless WITHOUT DISTORTION. 6 models for nibbling & shearing. Performs over 10 different metalworking operations. Send for 4 page descriptive Bulletin.

FENWAY GV

NIBBLER CO.

1912 N. Marshall St., Phila., Pa. 19122 • 215-236-7717
